

ERRATA SHEET
TENTATIVE ORDER NO. R9-2009-0110

WASTE DISCHARGE REQUIREMENTS
FOR
ORANGE GROVE ENERGY, LP C/O J-POWER USA DEVELOPMENT CO., LTD.
ORANGE GROVE POWER PLANT
SAN DIEGO COUNTY

The following changes have been made to tentative Order No. R9-2009-0110. Some of the corrections below are shown in bold and underline or strikethrough format to indicate added or removed language, respectively:

Errata Item No.	Section	Revision
1.	Finding 21, third sentence	<p>Revise the following language to read:</p> <p>It was <u>The Commission Decision</u> determined that the Power Plant would not have a significant effect on water quality provided conditions of certification (mitigation measures) are completed.</p>
2.	Facility Design and Operation Specification C.1	<p>Revise the following language to read:</p> <p>Within 180 days of the adoption of this Order, the Discharger shall develop and submit the Irrigation Management Plan to the Regional Board. The Irrigation Management Plan <u>shall be capable of effectively managing the application of nitrate to the landscape and</u> shall account for the following:</p> <ul style="list-style-type: none"> a. Soil characteristics; b. Effluent characteristics; c. General requirements of the major plant species being irrigated (e.g., seasonal demand, climate, nutrient requirements); d. Climatic conditions (e.g., precipitation, evapotranspiration rate, wind); e. Other supplemental nutrient additions (e.g., chemical fertilizers) generally used within the disposal area; and f. Management of impoundments used to store or collect effluent. <p><u>The Discharger shall begin implementing the plan no later than 60 days after submittal of the plan to the Regional Board.</u></p>
3.	Signature blocks	The tentative Order has been revised to reflect David W. Gibson as the new Executive Officer.
